

The graph displays the temporal evolution of several parameters. The x-axis is labeled with GLC, ZZ, RSI, RCB, CR, KTE, and RSTN. The y-axis has numerical markers at 0, 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100. Solid lines represent primary data series, while dashed lines represent secondary or reference series. Numerous numerical labels are placed along the lines to indicate specific values at various time points.
